

## **SALSA ON ICE REPORT: 28 October 2017**

### **Weather**

Weather conditions, sunny, winds light, temperature, minus 4C

**SALSA Drillers on ice:** Dar Gibson, Graham Roberts, Dennis Duling, Joshua Mehlin,

### **Drill Team Update:**

- Finished removing and replacing unistrut on side of Hose reel container for reattaching electrical components.
- External electrical was installed on HRC.
- Looked
- Travelled to LARS deck and did a survey of what is needed. Lars deck needs to be moved to SPOTSA area to allow for removal of DOER winch and removal of roving drill winch.
- Did an initial inspection of NIU's containers to prepare for shipping north. Found both of them in relatively good shape except for drifting inside of the containers.

### **Cargo**

- No cargo received.

### **Weekly summation**

This first week much of our time was spent travelling to the ice, getting our required classes taken care, and locating where our equipment/tools were stored. Once that was done we got a good start on the tasks we need to do this season.
