

SALSA ON ICE REPORT: 29 October 2018

Weather:

Weather conditions, partly cloudy, winds 12 knots, temperature high -02C,

SALSA Drill Team members on ice: Graham Roberts, Dennis Duling,
SCINI Team members on Ice: Bob Zook, Mark Bowling

Drill Team

- Moved Mini Van 7 next to C&C for unloading
- Unloaded tri-wall full of tools and took to the MEC
- Started sorting through the 20 foot container and separating needed drill equipment for moving to the MEC
- Made first trip out to SPOTSA site, and started preparing MEC for setup

SCINI

- Mark did sea ice training
- Rebuilt focus mechanism
- Cleaned sealed three cameras
- Software session with Dave and John
- Connected all modules and tested SCINI
- Prepared equipment for tank test
- Arranged for hut and drill on Thursday
- Tested monitor configuration

Cargo:

No new cargo on station, although flowmeters are have been tracked in the cargo system and will be on next plane.

Note:

MEC is in position and this lets us get to work with our tasking so we can stay on track with planned departure date for traverse. No pics today.
