

## **SALSA ON ICE REPORT: 22 November 2018**

### **Weather:**

Weather conditions, mostly cloudy, winds 5(knots), temperature high -5C

**SALSA Drill Team members on ice:** Graham Roberts, Dennis Duling, Jonas Kalin and James Roth

- Loaded SKINI into boxes, stacked and strapped for storage in Crary
- WHOI crate on the LARS deck and strapped for traverse.
- James Roth identified a faulty UPS devise and is going to fix
- Continued to track DNF crates, looking for drill computers and discussing contingency plans.

**Cargo:** DNF Crate to arrive Monday

**Note:** Things are going well, at this point all drill equipment (except DNF) is at SPOTSA and ready for traverse. James and I are troubleshooting UPS devises and discussing drilling options should we be without our drill computers. Worked with Crary personal to finalize SKINI storage.
