

**SALSA Field Report: 11 Dec 2018. Compiled by Matt Siegfried.**

**SALSA Geophysics/SALSA EM, Location: Whillans Subglacial Lake**

- Science is open for business at Whillans Subglacial Lake! We installed our first three MT stations on a balmy 25F Whillans day, including one within 300 m of the location of the 2013 WISSARD SLW borehole.
- Tomorrow, we keep rolling: the light winds this evening suggest overnight data should be sufficient for the sites we installed today, so we can already start moving these stations. Dig three up; install three.

*We found a WISSARD banana slug near one of our install sites today.*
